

Java Servlet

1 Servlet Overview

What is a Servlet?

HTTP Request and Response

Servlet Containers

2 Servlet Life Cycle

Load Servlet Class

Create Instance of Servlet

Call the Servlets init() Method

Call the Servlets service() Method

Call the Servlets destroy() Method

3 Java Servlet Example

4 HttpServlet

5 HttpRequest

Parameters

Headers

InputStream

Session

ServletContext

6 HttpServletResponse

Writing HTML

Headers

Content-Type

Writing Text

Content-Length

Writing Binary Data

Redirecting to a Different URL

7 HttpSession

8 RequestDispatcher

9 ServletContext

10 web.xml Servlet Configuration

Configuring and Mapping a Servlet

Servlet Init Parameters

Servlet Load-on-Startup

Context Parameters

11 Cookies and Servlets

Java Cookie Example

Reading Cookies Sent From the Browser

Cookie Expiration

Removing Cookies

Additional Cookie Settings

Cookie Use Cases

12 Servlet Filters

13 GZip Servlet Filter

Why GZip Compress Content?

GZip HTTP Headers

Why a GZip Servlet Filter?

GZip Servlet Filter Design

GZip Servlet Filter Code

GZip Servlet Filter web.xml Configuration

14 Servlet Concurrency
