PHP 3

20 Security and Encryption

Preventing Session Fixation

Protecting Against Form Spoofing

Ensuring Input Is Filtered

Avoiding Cross-Site Scripting

Eliminating SQL Injection

Keeping Passwords Out of Your Site Files

Storing Passwords

Dealing with Lost Passwords

Verifying Data with Hashes

Encrypting and Decrypting Data

Storing Encrypted Data in a File or Database

Sharing Encrypted Data with Another Website

Detecting SSL

Encrypting Email with GPG

21 Internationalization and Localization

Determining the User's Locale

Localizing Text Messages

Localizing Dates and Times

Localizing Numbers

Localizing Currency Values

Localizing Images

Localizing Included Files

Sorting in a Locale-Aware Order

Managing Localization Resources

Setting the Character Encoding of Outgoing Data

Setting the Character Encoding of Incoming Data

Manipulating UTF-8 Text

22 Error Handling

Finding and Fixing Parse Errors

Creating Your Own Exception Classes

Printing a Stack Trace

Reading Configuration Variables

Setting Configuration Variables

Hiding Error Messages from Users

Tuning Error Handling

Using a Custom Error Handler

Logging Errors

Eliminating “headers already sent” Errors

Logging Debugging Information

23 Software Engineering

Using a Debugger Extension

Writing a Unit Test

Writing a Unit Test Suite

Applying a Unit Test to a Web Page

Setting Up a Test Environment

Using the Built-in Web Server

24 Performance Tuning

Using an Accelerator

Timing Function Execution

Timing Program Execution by Function

Timing Program Execution by Statement

Timing Program Execution by Section

Profiling with a Debugger Extension

Stress-Testing Your Website

Avoiding Regular Expressions

25 Regular Expressions

Switching from ereg to preg

Matching Words

Finding the nth Occurrence of a Match

Choosing Greedy or Nongreedy Matches

Finding All Lines in a File That Match a Pattern

Capturing Text Inside HTML Tags

Preventing Parentheses from Capturing Text

Escaping Special Characters in a Regular Expression

Reading Records with a Pattern Separator

Using a PHP Function in a Regular Expression

26 Files

Creating or Opening a Local File

Creating a Temporary File

Opening a Remote File

Reading from Standard Input

Reading a File into a String

Counting Lines, Paragraphs, or Records in a File

Processing Every Word in a File

Picking a Random Line from a File

Randomizing All Lines in a File

Processing Variable-Length Text Fields

Reading Configuration Files

Modifying a File in Place Without a Temporary File

Flushing Output to a File

Writing to Standard Output

Writing to Many Filehandles Simultaneously

Escaping Shell Metacharacters

Passing Input to a Program

Reading Standard Output from a Program

Reading Standard Error from a Program

Locking a File

Reading and Writing Custom File Types

Reading and Writing Compressed Files

27 Directories

Getting and Setting File Timestamps

Getting File Information

Changing File Permissions or Ownership

Splitting a Filename into Its Component Parts

Deleting a File

Copying or Moving a File

Processing All Files in a Directory

Getting a List of Filenames Matching a Pattern

Processing All Files in a Directory Recursively

Making New Directories

Removing a Directory and Its Contents

Program: Web Server Directory Listing

Program: Site Search

28 Command-Line PHP

Parsing Program Arguments

Parsing Program Arguments with getopt

Reading from the Keyboard

Running PHP Code on Every Line of an Input File

Reading Passwords

Colorizing Console Output

Program: DOM Explorer

29 Packages

Defining and Installing Composer Dependencies

Finding Composer Packages

Installing Composer Packages

Using the PEAR Installer

Finding PEAR Packages

Finding Information About a Package

Installing PEAR Packages

Upgrading PEAR Packages

Uninstalling PEAR Packages

Installing PECL Packages

30 Example—Message Board

Making the Database

Writing the Templates

Creating the Index Page

Creating the Forum Page
