

Delphi (2)

9. Writing Delphi Components

- Extending the Delphi Library
- Building Your First Component
- Creating Compound Components
- A Complex Graphical Component
- Customizing Windows Controls
- A Dialog Box in a Component
- Collection Properties
- Defining Custom Actions
- Writing Property Editors
- Writing a Component Editor

10. Libraries and Packages

- The Role of DLLs in Windows
- Using Existing DLLs
- Creating a DLL in Delphi
- Advanced Features of Delphi DLLs
- Libraries in Memory: Code and Data
- Using Delphi Packages
- Forms Inside Packages
- The Structure of a Package

11. Modeling and OOP Programming (with ModelMaker)

Understanding ModelMaker's Internal Model

Modeling and UML

Coding Features of ModelMaker

Documentation and Macros

Refactoring Your Code

Little-Known Tidbits

12. From COM to COM+

A Short History of OLE and COM

Implementing Iunknown

A First COM Server

Automation

Writing an Automation Server

Using Compound Documents

Introducing ActiveX Controls

Writing ActiveX Controls

Introducing COM+

COM and .NET in Delphi 7

Part III - Delphi Database-Oriented Architectures

13. Delphi's Database Architecture

Accessing a Database: dbExpress, Local Data, and Other Alternatives

MyBase: Stand-alone ClientDataS

Using Data-Aware Controls

The DataSet Component

The Fields of a Dataset

Navigating a Dataset

Customizing a Database Grid

Database Applications with Standard Controls

Grouping and Aggregates

Master/Detail Structures

Handling Database Errors

14. Client/Server with dbExpress

The Client/Server Architecture

Elements of Database Design

Introducing InterBase

The dbExpress Library

The dbExpress Components

A Few dbExpress Demos

The Packets and the Cache

Using InterBase Express

Real-World Blocks

-

15. Working with ADO

Microsoft Data Access Components (MDAC)

Using dbGo Components

Using the Jet Engine

Working with Cursors

Transaction Processing

Updating the Data

Disconnected Recordsets

A Word on ADO.NET

-

16. Multitier DataSnap Applications

One, Two, Three Levels in Delphi's History

Building a Sample Application

Adding Constraints to the Server

Adding Features to the Client

Advanced DataSnap Features
